

## Airwolf 500 CNC Alloy Retract System.

We recently added these retracts to the web site As we thought they were miles better than the Heli Artist version.

You can find these at our web site here. £49.50 for the kit

[http://www.sportsmoto.co.uk/acatalog/Airwolf\\_Spares.html](http://www.sportsmoto.co.uk/acatalog/Airwolf_Spares.html)

We installed them like this image so we could use a normal size servo attached under the 3DX500 battery tray. The retracts themselves come with some wooden spacers you can glue to the wooden Airwolf 500 Heli Artist frame
